

UKS2 Geography – Mountains. Knowledge Organiser.

Summer 2025

Major Mountain Ranges of The World

How Fold Mountains are Made

Mountain Range	Power Station	Temperature
Continents	Reservoir	Environment
Tectonic plates	Fossils	Tourism
Fold Mountains	Climate Graph	Summit
Climate	Compass direction	Contour
Grid reference	Erosion	Precipitation

Why are mountains so important?

Success Criteria

I can:

- Explain how mountains are formed.
- Identify and name mountain ranges in the UK and the wider world.
- Recognise, describe and explain how climate differs in mountain environments by using data sets.
- Observe and record the common key natural features of mountain environments using maps and related OS symbols.
- Explain how reservoirs are man-made areas of water and how these have both advantages and disadvantages.
