VOCABULARY

lifecycle is the different stages of life for a living thing.

Mammal - A warm-blooded vertebrate animal of a class that is distinguished by the possession of hair or fur, females that secrete milk for their young, and typically give birth of live young.

Gestation period - foetal development period from the time of conception until birth.

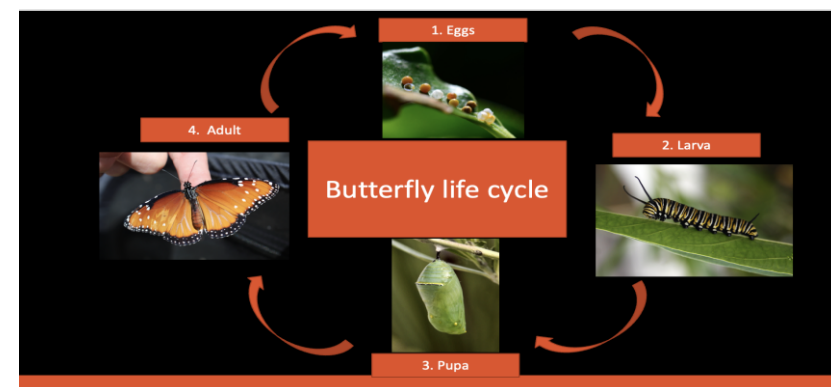

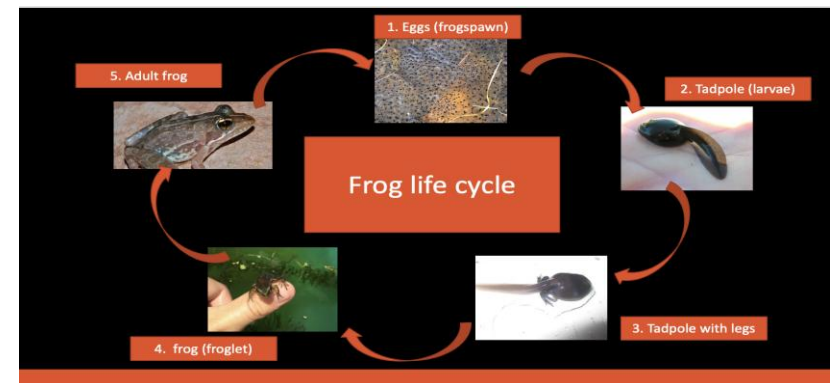

Foetus - an unborn or unhatched offspring of a mammal.

Puberty - time when the body begins to develop and change as you move from a child to an adult.

Development of a foetus

Animal reproduction and life cycles

A life cycle is **the different stages of life for a living thing**. All animals, including humans, have a life cycle as all animals are born, grow, reproduce and die. In science, it's usually displayed as a circular diagram showing each stage in words and/or pictures.
